Connect random letters together to form words and clear how many lines as possible! From Ken Michaels, Guest Writer in Shakespeare's work á ě œHamletá ě, Polonius asks the Prince: á ě œWhat what reads, my lord? Á ě is not at all satisfied with what is reading. Hamlet answers , á ě œAme, words, words á ě ĩ ĩ I previously described the communication model in which a sender encodes a message and then sends it via a channel (or half) to a receiver, which decodes the message and, ideally, understand what has been Surely the most common way of coding a message is to choose the most appropriate words for the listener or reader. In the case of Hamlet, he didn't like what he read that he described it in an elementary way, as simple words, rather than a message. So I thought I'd give a little ink to the words themselves. "Nym" words have specific specificWords ending in nym describe classes of words. Some of the most used words are synonymous (equal media); antonym (meaning the opposite); the same sound; and acronym (a word derived from the first letters of a more complex term, such as SCUBA or AIDS). Homo means "same", hetero means "different". Therefore, if there are omonyms, it is right that there are also etheronimas. While the homones have the same sound but different orteggiatures (such as couple and pear), etherons are written the same but have different meanings and, often, pronunciation: a sewing person is a sewer, but a repository for waste products is a sewer. Sewer, then, is an etheronim. But the lexicon of nymphs doesn't end here. One of the sites I visited recently2 lists no less than 26 words, many of which are quite arcane and of interest to relatively few. Some are really funny. Do we really need a word to say another word of two identical parts? If so, then tutu, pawpaw, yo-yo, and bye-bye are tautonyms. A couple of weeks ago, my son asked me what a metonym means. I didn't know, so we looked up. In retrospective, I should have been able to logic out, as "meta" means change. A metonym is a word that designates something from a word that is associated with it. For example, Hollywood is a metonym used to indicate the US film industry, while the Crown refers to royalty, and the bottle refers to alcohol. My use of the expression "a little ink" a couple of paragraphs back is also a metonym for written communication, even when it is not involved in real ink or writing on paper. The point of all this has to do precisely in the use of our language. It won't do me well to code a message using a word like metonym, or etheronimo, or tautonym, unless I'm sure that my listeners (or readers) know its meaning. Or this, or I am ready to add the definition for their benefit, in such case I may have just used the definition first. However, learning the correct use of words, however arcane, can be useful, and if you like the words themselves, even fun. What's your Godfather? In his book "The Half Life of Facts, because all we know has an expiry date," Samuel Arbesman3 discusses changes in the language that occur over time, and the two fields that see this phenomenon differently. He explains the prescribed grammars like those who focus on how words should be used, and descriptive grammars like those who are more interested in the way they are actually used. Arbesman states that each individual develops its own set of rules on how to use words, and that all of us, you, me and all the others, have our own idioletThis delightful term describes our unique language and our speech model, as determined by what we have learned when we were young, as well as those around us, and includes our grammar, vocabulary, vocabulary, of words, and also our accent. There's an important lesson here. If we continue to communicate effectively, we must be aware that every time we codify a message, someone whose idiolect is significantly different from ours could simply decode it in such a way as to get a whole different message. Then pay attention to our choice of words; Is it really a message or just "words, words, words"? © 2013 Ken Michaels. All rights reserved. References: Shakespeare, William: á ě œHamlet, á ě ACT 2 Scene 2. Arbesman, Samuel: á ě "The half-life of facts: Because everything we know has an expiration date, á ě "New York: Penguin Books, 2012, page 190. Ken Michaels, retired head of visual communications, biomedical research Leidos, is a special volunteer for NCI to Federico. Like anyone who has ever learned a language, translation between languages is difficult. Words that do not have a direct equivalent in another language are often considered "untranslabiltable. Á »While these words are often lost in translation, they can have fun, strange meanings or beautiful meanings, making them worth learning. Here are 25 of our favorite words that are not available from other languages. Korean (n) the art of the mood of others, reading the situation and react appropriately.
